WRR 20 D

Automatic Straightening Machine from coil

Automatic, electronically controlled plant of the WRR series, which allows the straightening and cutting-to-length of cold drawn and hot rolled wire from coil, up to a length of 12m. The machine is fitted with 8 independent hyperbolic rotor straightening groups which allow completely automatic and rapid diameter change. This double line version permits the simultaneous processing of two coils which notably increases the plant's productivity. Diameters ranging from 6 to 16 mm can be processed; 2 wires, each of maximum diameter 16mm may be processed simultaneously.

DESCRIPTION
