Concept 91

Concept 91 is an Automatic Stirrup Bender, bidirectional, electronically controlled for the production of small and medium sized stirrups. If supplied with the appropriate supporting and collection channelling extension units, is able to produce cut to length bars, as well as bent/shaped bars with bends on one side only, up to a length of 12 m.

The 2nd generation "MEP SYSTEM" straightening technology guarantees maximum flexibility and quality within specific production requirements. Concept 91 can process at high speed from 6 mm to 16 mm in single strand and from 6 mm to 12 mm in double strand.

Syntax Line 25
Cutting and shaping equipment

Syntax Line 25

Cutting and shaping equipment

The SYNTAX LINE is a complete and fully automated cut and bend station for processing of stock rebar. The complete production cycle (loading, cut and bend) is conceived to be carried out in full automation, without requiring any manual handling by the operator. The large extent of equipment functions and the flexibility in programming the production cycles, makes the SYNTAX LINE capable to manage any production requirement providing an outstanding quality of the finished products.

Mini Syntax 16 HS

Stirrup bender and automatic shaping from coil

The MINI SYNTAX 12-16 HS is the sum of all best technology solutions developed in the field of coil processing, straightening and shaping. In this machine it is reached the maximum level of flexibility, productivity and product quality.
